SOAR
WITH OUR INTEGRATED SOLUTIONS.

LEVERAGING SOFTWARE APPLICATIONS, FRAMEWORKS AND DATABASES CAN SAVE YOUR COMPANY BOTH TIME AND RESOURCES.

WHO WE ARE

SpinSys develops systems integration solutions for cloud-based services, specializing in enterprise sustainment and modernization.

WE CAN HELP YOU CREATE BUSINESS INTELLIGENCE FROM BIG DATA PROBLEMS.

We offer expertise in hardening your systems to create an enhanced security posture, modernize complex legacy systems and augment the enterprise IT department.

Our customers rely on us for secure cloud applications, modernization efforts and developing business intelligence out of big data. Our experience and expertise translate into a valuable knowledge base of transferrable lesson learned and best practices.

HOW WE HELP

SpinSys is in the business of creating time so our customers can follow their passions. We do this by being the premier small business systems integrator for cloud-based services, specializing in sustainment and modernization for the enterprise. By taking the complexity out of building and migrating applications into a private or public cloud, our always-available solutions create time for our customers to make informed business decisions.

WHO WE SERVE

SpinSys possesses a deep understanding of our **DoD**, other federal, and civilian customers' compliance frameworks including **FISMA, DIACAP, HIPAA, and DCID** mandates so we can architect the solution to match the cloud vendor's capabilities and maintain consistent security and governance standards across multiple platforms. **Contracts vehicles include:**

- **GSA IT Schedule 70**
- **SeaPort-e (Navy)**
- ITES-25 (U.S. Army)

- ITSS-4 (DOJ)
- CIO-SP3 (NIH)
- TEAMS (MHS)

- JITC (DoD)
- T4 (VA)
- CATS (USAF)

WHAT WE DO

→ Develop cloud-based systems integration solutions through AWS-certified expertise enhanced with proven technology and integration experience

→ Provide agile software development services using COTS solutions for the full lifecycle: requirements gathering and gap-analysis, design, development, implementation, testing, deployment, and maintenance

→ Sustain and modernize legacy enterprise applications and systems

→ Build solutions for big data, from consolidation of data centers and networks to deploying hardened systems into cleared environments

CLOUD-BASED SOLUTIONS

SpinSys is partnered with cloud computing industry leaders including Amazon, Google, and Microsoft. As a vendor-agnostic provider of private and public cloud migration of legacy applications, we are uniquely poised to help you integrate your solutions with cloud-based applications.

Use our proven agile engineering methodology to conduct a cloud-computing assessment and perform design, development, implementation, and ongoing managed operations in the cloud.

Application Services
Our customers rely on us for secure cloud applications, modernization efforts and developing business intelligence out of big data.

Cloud-Based Services
SpinSys has successfully deployed complex cloud-based solutions for both commercial and federal customers, and has in-depth experience in Amazon Web Services based cloud offerings.

Big Data & Analytics
By harnessing processing power and analytical skills we extract business intelligence from across the data landscape to help our customers make more informed business decisions.

Cyber Security
SpinSys' cyber security capabilities span the gamut of delivering network defense, incident management, certification and accreditation and analysis.

IT Managed Services
Whether you need assistance with your help desk, infrastructure or simply comprehensive management of your data center and NOC, **SpinSys** provides end-to-end support for your managed IT services.

System Modernization
SpinSys has decades of experience in modernizing legacy systems. We have developed a proven methodology for legacy system sustainment while introducing cost-effiiciencies by utilizing manual and automated processes.

LET'S TALK!

SpinSys is the premier small business systems integrator for cloud-based solutions, specializing in sustainment and modernization for the enterprise. Call us today to see how we can bring the advantages of a secure cloud deployment to your enterprise.
